To determine your shank size: Lower your foot and measure the distance between the center of the hole for the foot mounting screw, and the needle plate (reference images to the right).

We offer 4 different ½” Ruler Foot styles and 3 different thicknesses of templates based on shank height. The “½” refers to the diameter of the foot. This results in a stitch line that is always ¼” from the outer edge of the foot.

Flip over for listing of popular machine models and their recommended Ruler Foot & Template sizes.
TEMPLATE & RULER FOOT MACHINE SIZE GUIDE
